
Nebraska Guide

to smoke free Dining

The Tobacco Free Nebraska Program (TFN) is located in the Health Promotion and Education Section of Nebraska Health and Human Services System. The program is funded through the Centers for Disease Control and Prevention/Office on Smoking and Health.

The primary goals of the program are to:

- *reduce youth initiation to tobacco products
- *eliminate exposure to environmental tobacco smoke
- *promoting cessation among youth and adults
- *eliminate disparities among minority populations across the state

The program provides resources to educators, schools and others through the Tobacco Free Nebraska Resource Library. Curriculum and educational materials are available on a free-loan basis.

The program provides training for educators and community groups and sponsors the annual State Tobacco Prevention Conference each spring.

For more information on the Tobacco Free Nebraska Program, or for assistance with tobacco prevention and education activities in your community contact:

Protect Yourself from Secondhand Smoke!

Secondhand smoke is a mixture of 4,700 chemical substances that are given off by the burning end of a cigarette, pipe, or cigar, and the smoke exhaled from the lungs of smokers. When eating at a restaurant with a smoking section, secondhand smoke knows no boundaries and is present throughout the whole restaurant. Secondhand smoke can ruin a nice evening dinner due to the odor of tobacco smoke and, in extreme cases, cause restaurant patrons to experience watery eyes, stuffy sinuses, and difficulty in breathing.

What can you do to protect yourself from secondhand smoke? Start by using this smoke-free restaurant brochure as a guide to choose a smoke-free restaurant. There are over 775 smoke-free restaurants to choose from in Nebraska. Second, you can join or support local Tobacco Prevention Coalitions which are listed throughout the guide. If there is no coalition in your community, call the Nebraska Department of Health and Human Services, Health Promotion and Education, at 402-471-2101 for more information. Third, patronize restaurants that are smoke-free and approach restaurants that are not smoke-free and ask them to go smoke-free.

The Tobacco Free Nebraska Program wants to keep the smoke-free restaurant guide updated. If a restaurant meets the smoke-free restaurant guidelines and is not listed, call the program at 402-471-2101, use the form at the end of this booklet or *Email GASPNEBR@AOL.COM*. Also, if a restaurant does not meet the guidelines and is listed, please notify us. A list of these restaurants can also be found on the Internet at <http://www.healtheducation.org>.

Smoke-free Restaurant Guidelines

In order to be on the smoke-free list, a restaurant must meet the following guidelines.

1. The inside area of the eating establishment must be 100% smoke-free at all times. Restaurants which allow smoking outside can be listed, as long as the inside is 100% smoke-free.
2. Restaurants may not have an adjoining bar where smoking is permitted, unless the bar is separate, fully enclosed, and on a separate ventilation system.

(Adapted from GASP of Colorado)

Facts about Secondhand Smoke

1. There is no safe exposure level for secondhand smoke. It contains 43 cancer-causing agents. The EPA has classified tobacco smoke as a Group A carcinogen, the same rating given to asbestos and arsenic.
2. Tobacco contains 4,700 chemicals including: radon, benzene, asbestos, arsenic, formaldehyde, cadmium, hydrogen cyanide, and radioactive elements.
3. Over 2,770 Nebraskans died in 1998 from diseases related directly to cigarette smoking.
4. The EPA estimates that passive smoking is responsible for between 150,000 and 300,000 lower respiratory tract infections in infants and children under 18 months of age annually, resulting in between 7,500 and 15,000 hospitalizations each year.
5. The EPA concluded that exposure to environmental tobacco smoke—commonly known as secondhand smoke—is responsible for approximately 3,000 lung cancer deaths each year in nonsmoking adults and impairs the respiratory health of thousands of children.
6. Tobacco smoking has long been recognized as a major cause of death and disease, responsible for an estimated 434,000 deaths per year in the United States.
7. Burning tobacco smoke creates bad odors which cling to people's clothes, hair, and even their skin.
8. 53,000 nonsmokers die each year from lung cancer, heart disease, and other cancers caused by secondhand smoke in the U.S.

Smoking and Restaurants

1. Bar and restaurant employees are twice as likely to develop lung cancer than the general working public.
2. Researchers at Cornell University found that a smoke-free policy for restaurants attracts more business and revenue than it drives away.
3. Employers who have banned smoking report dramatic decreases in the maintenance costs. Furniture and drapes last longer and have to be cleaned less often.
4. Ventilated or segregated smoking areas will not provide adequate protection from all the chemicals in tobacco smoke. It can take up to two weeks for nicotine to clear from the air where smoking has occurred.
5. Reservations and seating are simplified and the wait period is often shorter when restaurants are smoke free.
6. The air is cleaner and you can smell the food better when restaurants are smoke free..

Each city name is followed by its area code (308) or (402). New this year: we have grouped the restaurants by “type.” Restaurants are listed alphabetically in “*FINE DINING*”, “*CASUAL DINING*” and “*FAST FOOD*” groups. We hope this is useful when you are looking for a certain type of restaurant.

GASP

Group to Alleviate Smoking Pollution

GASP published the first Non-smoking Restaurant Guide in 1991. It had only twelve 100% smokefree restaurants. The Nebraska Health and Human Services System is now publishing this statewide guide with the help of GASP and many other groups. These groups are listed throughout this booklet.

If you need help, or want to help promote smokefree dining and other public and private workplaces, please contact the group that is closest to you. You may also reach GASP at the address and phone number below.

GASP helps individuals and groups protect their right to smokefree air at work and in public places.

GASP also works to end teen and pre-teenage addiction to tobacco. The average age for a person to become addicted to tobacco is fourteen. This is a childhood epidemic that can and must be stopped.

Restaurants that hold approximately eighty people or more are required to have a "nonsmoking" area. It should be over half of the seating area. The entrance and waiting area must be nonsmoking. WARNING: Smaller restaurants may be 100% SMOKING.

To update listing please contact:

Mark Welsch, President
GASP of Nebraska
5611 Howard Street
Omaha, NE 68106-1257
E-mail: GASPNEBR@AOL.COM
(402)-558-0463

The Tobacco Free Nebraska Program wants to keep this guide updated and accurate. If you find a dining establishment that meets the guidelines and is not listed, please notify us. Also, if a dining establishment is listed and does not meet the guidelines, notify us.

Smoke-Free Dining Guidelines

- The inside area of the eating establishment must be 100% smoke-free at all times.
- Restaurants may not have an adjoining bar where smoking is permitted, unless the bar is separate, fully enclosed, and on a separate ventilation system.
